

Who We Are

Our team is comprised of talented industry experts, engineers, fabricators, tradespeople, and craft workers across three North American locations. Their diverse experience, ideas, and ideals give Crown products the edge in innovation, quality, and performance.

What We Offer

Crown builds some of the highest-performing and most reliable power and control distribution systems available.

Our Relay Panels are offered in a variety of designs that continue to evolve and develop, meeting the changing needs of a wide range of industries.

We build expertly commissioned medium voltage Metal-Clad and Arc-Resistant Switchgear for efficient power control and distribution.

We build Enclosures for critical control and distribution equipment that can't afford to stop working due to a catastrophe.

We Design, Build, and Service utility infrastructure that powers the digital world.

Superior Workmanship

On-Time Delivery

World-Class Quality

Exceptional Value

Made in the USA

One-Stop Shop

Fully-integrated, custom and turnkey solutions including post sale services.

All design, engineering, and manufacturing are handled in-house, giving you the confidence of a single point of contact throughout the entire product lifecycle. We also offer aftermarket services to ensure long-term durability and performance.

Bring your entire system under one roof with our fully compatible enclosures engineered for seamless integration and reduced on-site labor. Drop-ready and pre-approved by multiple utilities, our solutions streamline your workflow from delivery to deployment.

With over 26,000 products deployed nationwide! Our proven track record has earned us a strong industry reputation leading to limited competition with multiple partners across the U.S.
