

Pre-Fabricated Enclosures

We build enclosures for critical control and distribution equipment that can't afford to stop working due to a catastrophe.

Improve system reliability, reduce startup costs, and save time with an enclosure that is engineered, manufactured, fully integrated, and tested by Crown Technical Systems. Our robust drop-in-place steel enclosures are customized to meet project requirements and delivered ready to perform in any climate or seismic zone.

- Power Control Assembly
- Power Distribution Centers
- Traction Power Substations
- Any Size Enclosures
- Reliability and Protection

We Design, Build, and Service utility infrastructure that powers the digital world.
